Summary and background of the report

With the Law No. 5681 dated 02.06.2007, some amendments were made in Law of Police Powers (LPP) No. 2559 for reasons such as “a very rapid increase in terrorism, complaints and crime rates”. The legal basis for the power “to stop and ask for identification”, which was regulated in the “Regulation on Judiciary and Prevention Searches” (RJPS) dated 01.06.2005, was created especially with the Article 16 titled “Use of Force and Weapon”. There was an unlawful use of power before that date.

Concepts such as “**reasonable doubt, foresight and discretion**” were reformulated with some amendments made in the Law No. 6638, which entered into force on 27.03.2015 with the name “Law Amending the Law of Police Powers, Gendarmerie Organization, Duties and Powers Law and Some Other Laws” and known by the public as Internal Security Law.

Due to lack of adequate training for law Enforcement Officials regarding abstract concepts such as reasonable doubt, foresight and discretion, more than 400 cases that, in fact, should have been processed according to the Law of Misdemeanors have resulted in death as a result of the fact that each law enforcement officer attributes a meaning to the Article 16 of the LPP, which regulates the authorization to use weapons by law Enforcement Officials, and therefore each law enforcement officer takes an action according to this, despite a regulation was made on the reasons, subjects and purposes of stopping and asking for identification, the form, duration and form of the procedure.

In cases that resulted in the deaths of civilians, including children and women, the right to life of the suspects was abolished although there was no attack and violence against the police, no armed conflict with

the police, no response to the government's influence and actions with weapons, and no violence and rape that endanger the life and property of others.

As a result of these severe violations of rights, serious perceptions have emerged in the society that law Enforcement Officials can at any time use violence, shoot with a gun, and kill anyone who continues his in daily life or opposes the Law of Misdemeanors.

The society has a strong perception both about the violations of the right to life and that the disproportionate force exerted by the police against the awareness of claiming rights and social reflexes in the society goes unpunished. The fact that administrative mechanisms ignore the obligation of law Enforcement Officials to comply with the "proportionality and necessity" criteria of international human rights law, and the perception of protecting and guarding the criminal created by the statements of bureaucrats in executive positions play an important role in the formation of these perceptions.

"CHILDREN WITH VIOLATIONS OF THE RIGHT TO LIFE" REPORT SENT TO THE UNITED NATIONS COMMITTEE ON THE RIGHTS OF THE CHILD

It has been observed that the right to life of children is widely violated in Turkey, it is difficult to reach the necessary and reliable data in order to monitor and report on the violations of the right to life, and as in other human rights areas, the risk factor is high in cases of child mortality.

Another phenomenon encountered in cases resulting in the death of children is "Impunity". It is observed that a comprehensive and deterrent investigation is not carried out, those responsible are not revealed.

led, investigations and prosecutions are not carried out effectively, and administrative mechanisms take an active attitude to protect and watch over the criminals.

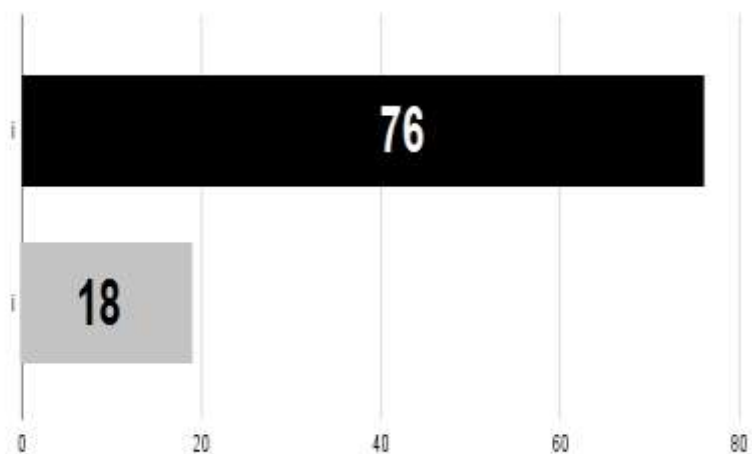

With the amendments made in the Law on the Duties and Powers of Police in 2007 and 2015, new powers based on abstract concepts were given to the police. The police force, which gives some meanings to abstract concepts in its own way, violated the right to life of 94 children, including babies, who were not even 18 years old.

As a result of the classification of children whose right to life has been violated within the scope of the human rights monitoring program of the Baran Tursun Foundation, it was determined that 76 of the 94 children who were executed without trial were in the eastern and southeastern provinces of Turkey, and 18 were in other provinces.

In the background of the cases; It has been determined that 76 of the 94 children who do not clash with the police, do not use violence against the police and do not pose a threat to the life of others, and who do not even know how to escape from the police, are in the eastern and southeastern provinces.

The fact that most of these fatal cases are in the Southeast region has hurt the conscience of the citizens residing in the region, and their trust in the administrative mechanisms and the police force has weakened.
